

Folks ... Why are you attempting to stop Satellite radio from providing public services?? This seems so unlike any FCC offerings since it's inception. Service to the community was always a hallmark of the FCC. Please reject the NAB's petition 04-160 for the good of the people. Folks have been turning away from local FM stations because they have become greedy and most of the air time is advertisements. Do not penalize the listeners of satellite radio with this ruling.

Thanks for your valuable time ...
